# ARRAYA SOLUTIONS TECH SUMMIT

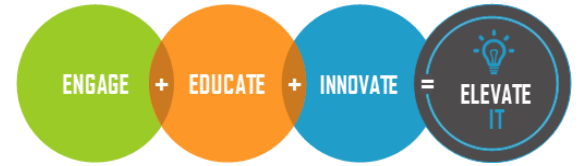

## SESSION OVERVIEW

TOPIC	SESSION TITLE	DESCRIPTION
BUSINESS CONTINUITY	Einstein Healthcare: How a Top Healthcare Network Revitalized its Business Continuity Plan	A panel of IT professionals from Einstein Healthcare Network will discuss how they overhauled their disaster recovery plan—saving money and ensuring consistent patient care in the event of a disaster.
BUSINESS TO BUSINESS VIDEO COLLABORATION	Cisco Collaboration EDGE Architecture & Mobile Remote Access Configuration	Understand how to use Collaboration Edge to provide easy business to business video and Jabber remote access.
CISCO COLLABORATION	Cisco Collaboration Endpoints	Exploring the latest endpoint technologies supporting Cisco's Multimedia Collaboration Portfolio.
CISCO UC	Finesse & Cisco Contact Center: Next Generation Collaborative Customer Care	Learn how integrating Finesse with your Cisco Collaboration portfolio simplifies administration and development for IT System Administrators.
CONVERGED & HYPER-CONVERGED INFRASTRUCTURE	Understanding Reference Architecture, Converged and Hyper-Converged Data Center Solutions	How will you consume data center technologies now and in the future? Learn about the differences and use cases for Reference Architecture, Converged and Hyper-Converged Solutions.
ESM IN HEALTHCARE	Automating Mergers & Acquisitions with Project Management, KPIs and Dashboards	Learn about how ServiceNow's suite of applications can be leveraged to automate processes, gain efficiencies and introduce intelligent reporting to improve IT service delivery for healthcare organizations.
END USER COMPUTING	Comparing Application Delivery Models for End-User Computing	Gain insight into which application delivery methods are most optimal for specific use cases.
ENTERPRISE MONITORING	A Guided, Proactive Approach to Enterprise Monitoring	Most IT people know what enterprise monitoring does and why it's important. We want to take this to the next level, to facilitate implementing a business-needs driven effective monitoring solution.
EXCHANGE	Compliance in Exchange	Learn how to use the advanced built in features of Exchange to implement solutions to your compliance requirements.
FLASH STORAGE	FLASH: The Methods Behind the Madness	Learn about the different flash offerings and their use cases.

# ARRAYA SOLUTIONS TECH SUMMIT

TOPIC	SESSION TITLE	DESCRIPTION
GIGABIT WI-FI	Gigabit Wi-Fi: The 802.11ac Standard Network Design & Benefits	802.11AC: What is it? How does it work? How can my organization use it?
INTELLIGENT WAN (IWAN)	Cisco Intelligent WAN: How to Deliver Uncompromising Branch Application Performance	Gain insight into the main pillars of iWAN and their fit to the solution: transport independent WAN, intelligent path control with performance routing, application visibility and control, secure connectivity.
MANAGED SERVICES	How to Enjoy a Cup of Coffee: Utilizing Managed Services to Free Up Time and Resources	An operational discussion on ways to automate and optimize your infrastructure and get the most out of your existing service agreements.
MICRO-SEGMENTATION WITH NSX	Use Cases for Micro-Segmentation with NSX	Learn how VMware NSX can improve security in a virtual environment by introducing what Micro-Segmentation is and how to configure it.
NEXT GENERATION SECURITY	Next Generation Security with Cisco Sourcefire	Gain a basic understanding of Cisco's SourceFire Defense Center product and how it can protect your organization.
PCOIP	Troubleshooting PCoIP Sessions in VMware Horizon View	Demonstration on how to troubleshoot PCoIP sessions in VMware Horizon View to restore connectivity and improve the user experience.
SERVICENOW & MICROSOFT	ServiceNow: Introduction and Microsoft Integration	An introduction to the capabilities of ServiceNow as well as its integration with Microsoft technologies.
SKYPE FOR BUSINESS	Using the Full Potential of Skype for Business: Discovering Features Beyond IM	Learn how Microsoft Skype for Business can be used to enhance intra and inter-office communications to enable a more efficient workforce.
VCLLOUD AIR	VMware Cloud Overview	Learn how VMware's cloud solutions, including vCloud Air and Horizon Air, provide unique capabilities and allow for a seamless hybrid cloud.
VREALIZE OPERATIONS	Automate IT Operations Management with vRealize Operations	A discussion on best practices, tips and concepts for troubleshooting, as well as custom reports and dashboard creation within VMware's vRealize Operations product.
WORKFORCE MOBILITY	Enabling Your Mobile Workforce with Office 365, Microsoft Azure, and the Enterprise Mobility Suite	Learn how Microsoft's cloud offerings can be combined to provide a great user experience for today's mobile worker.
