

Managed Services for Network Security

Network security has turned into an arms race. Businesses are flocking to the latest and greatest technologies in order to keep their data safe and would-be intruders out. However, security tools are only part of the equation. The rest is on IT itself. Supporting and managing best-of-breed security solutions requires tremendous specialized knowledge, first-hand experience and time. If existing IT teams can't meet every one of those requirements, the door remains open for cybercriminals.

Hiring dedicated personnel to address those shortcomings is one option, but doing so also takes time and resources that companies may not have. Another option? Arraya's Managed Services for Network Security.

Hands-Off Enterprise Security

Arraya's Managed Services for Network Security gives customers direct access to our security experts. Our team supplements and expands upon the skills of the personnel already on staff. It stands ready to shoulder the workload associated with supporting an organization's security effort. Whether a task is outside of the expertise of on-site IT or merely consuming too much of its time, our team can handle it.

Our Managed Services for Network Security service covers:

- Managing (security) zones, networks and locations
- Inspecting, blocking and altering malicious traffic (using intrusion detection policies)
- Handling early detection, reputation-based blacklisting
- Adding or editing access control policies and rules
- Providing 24x7 monitoring and alert response
- Detecting, analyzing and tracking files (and protecting against malware)
- Generating reports for hosts, users, attacks, malware threats and overall network status

DISCOVER ARRAYA

At Arraya Solutions, we began with a simple vision: To combine technological expertise and personal service that would empower our customers to solve their individual IT challenges. The result is more than 15 years of growth and solutions-driven results that have made us one of Microsoft's best partners.

Serving the mid-Atlantic region, we work with clients of all sizes, across all industries. Our passion for superior knowledge of the IT industry has led us down a path of tremendous growth, but we still make it a priority to keep our small-business roots—ensuring every customer receives the personal attention it deserves. Our success stems from our experienced and highly trained staff, our innovative outside the box approach and our partnerships with the industry's leading technology providers.

What Sets Us Apart

Our Managed Services team works closely with customers to get to know their business, their industry and their unique pain points.

Managed Services team members undergo a rigorous selection process to ensure customers receive a "superhero" level of service.

Arraya's Managed Services team has been named year-over-year to The Channel Company's CRN Managed Service Provider (MSP) 500 list as one of the MSP Elite 150.

Arraya's Managed Services incorporate our enterprise-grade Alert platform to monitor designated systems and applications for availability, health and performance.

Arraya's team is available 24/7, 365 days a year to investigate alerts, resolve issues and manage changes according to industry best practices.

We've worked hard to give our diverse customer base customized IT solutions.
