

Project Management Services

On budget, on time, and with every goal accomplished. That's the ideal end state of every business project. However, the path between a project's start and that idyllic conclusion is littered with complications waiting to slow it down or derail it entirely.

Arraya Solutions' Project Managers are adept at avoiding those pitfalls and keeping projects of all shapes, sizes, and disciplines on track. By leveraging our Project Management Organization as part of a staff augmentation, your organization will get:

A DEDICATED RESOURCE FOR ALL OF YOUR PROJECTS — Our Project Managers are highly skilled at leading the charge on IT projects – but that's not the end of the value they provide. Your dedicated Project Manager can serve as the central hub for all of your projects, both internal and external, regardless of focus area.

A PARTNER COMMITTED TO YOUR SUCCESS — Our team is dedicated to becoming an extension of your organization throughout an engagement. To do this, Project Managers take the necessary steps to learn about what's in place and what it should look like tomorrow. To ensure a successful transition, they work closely – and maintain open lines of communication – with your team.

ACCESS TO OUR PROVEN, EFFECTIVE METHODOLOGY — Our team adheres to the best practices laid out by the Project Management Institute, a globally-recognized leader in the project, program, and portfolio management professions. By utilizing these tried and true guidelines, our team is better able to help organizations achieve full value from their projects.

The Arraya Approach
