

Overview

Your organization's critical business data is its most valuable asset. Which is why you have invested significant amounts of capital and resources into storing, managing and protecting your business data — and why Arraya Solutions has developed our Storage Health Check Service. Arraya's certified consultants will work with your team to understand your unique storage environment and provide guidance on the current best practices for configuring, managing and protecting your data. Working together with your team, a consultant will review your data storage infrastructure and provide actionable recommendations to optimize your environment.

Benefits

- Optimize storage performance, increase data availability, simplify management and reduce risk.
- Maximize resources through efficiencies and roadmap for future improvements.
- Mitigate risk by leveraging experienced consultants and proven best practices.

Deliverables

- Conduct assessment of data storage environment leveraging performance and capacity gathering tools and techniques.
- Collect empirical data associated with the storage, management and protection of data.
- Perform assessment of storage environment including, storage array(s), storage network architecture, information management capabilities, backup and recovery, archiving, data availability, firmware and software.

Key Activities

1. Kickoff call
2. Architecture and operations review
3. Technical audit and analysis
4. Review of business objectives
5. On-site wrap up
6. Create assessment report
7. Review final assessment report

Scope

- Up to two (2) days on-site and one (1) day off-site to create assessment report.
- Health Check focuses on storage arraya performance & scalability, storage network architecture, information management capabilities, data protection & availability, firmware and software versions.
- Maximum of five (5) participants for interactive workshop.
- Storage Health Check will be delivered by an Arraya Solutions certified consultant.

Creating Solutions to Simplify Your Business

Arraya Solutions is an infrastructure consulting, application development and managed services provider, specializing in technology solutions that help our clients achieve business success. Arraya enables its clients to optimize investments, improve productivity and minimize risk by leveraging our people, partners and proven methodologies.

Arraya's experience and expertise are what set us apart. Clients are never just another project to our team. We take time to understand your business and pain points in order to create a strategy to reach your company's full potential and vision. Our clients receive the talent and knowledge of a large corporation and the personal attention of a small company.

At Arraya, service is more than just answering questions. Service to us is understanding your company, your technology and your business goals. It's being prepared and obtaining the most current training to give you accurate and informed support. Most importantly, it's about being there for you - before, during and after the project.
