

Microsoft 365 Customer Immersion Experience

Microsoft 365 isn't just a brand name; it's a mission statement. It speaks to Microsoft's belief that technology can transform every facet of the modern workplace, delivering a more productive, secure experience. However, it can be a daunting task for newcomers and long-time users alike to master this vast array of solutions and to figure out how it all fits into their workdays.

Arraya's Microsoft 365 Customer Immersion Experience (CIE) is a **no-cost**, hands-on, guided workshop that can be tailored to the skill levels and needs of attendees. During this half-day session, attendees step into a variety of real world scenarios and use cases armed with the latest solutions and devices from Microsoft. The goal? Help users feel more at home with Microsoft 365 and allow them to be better prepared to extract full value from current or future investments.

Experience the full breadth of Microsoft 365

Arraya's Microsoft 365 CIE can be broadly focused on three separate topics:

PRODUCTIVITY & COLLABORATION

This session will cover the ways in which Microsoft 365 innovations such as Teams, OneDrive for Business, and SharePoint are reimagining the workplace and what it means to work together.

Among other solutions, attendees can learn how to utilize Flow, Planner, Teams Bots, and Workflow Automation.

SECURITY, PRIVACY & COMPLIANCE

Here the focus will be on the ins and outs of configuring and leveraging Microsoft 365's various security tools, including Windows Defender, Secure Score, Data Loss Prevention, Office 365 MFA, and more. This session will also demonstrate how to audit compliance with standards such as HIPAA, GDPR, and NIST.

CIE FOR ADMINISTRATORS

This session will be geared towards the admins tasked with supporting Microsoft 365 environments, covering how to how to configure policies, run reports, validate sharing, manage licenses and more all in the name of providing the access and freedoms modern business users demand.

Ready for your own immersive experience?

Arraya's Microsoft 365 CIEs are typically held at the Microsoft Technology Center in Malvern, PA, where attendees have access to the full range of devices and resources driving digital transformation efforts across the business landscape. However, they can also hit the road, coming directly to an organization's user base. Either way, Arraya's Microsoft 365 CIEs are no-cost events that provide a full lunch as well as all of the technology attendees will need to get the most out of the day.
