

SHAREPOINT SOLUTIONS

Collaboration starts with data and content. Employees are creating more documents than ever before and the first thing they do when they create something new is share it out. Traditionally, this has been through email and Windows file shares. This can be painful to manage, cause version sprawl, create redundant data and open up security risks.

SharePoint and OneDrive for Business bring modern collaboration to your business. Both solutions unlock additional functionality within your traditional Office software, making it easy to collaborate on documents, surfacing content intelligently to you through Delve, allowing end users to build portals for collaboration, keeping attachments out of email and ultimately reducing email volume. This experience builds on the familiarity of Office tools to give your employees a way to focus their content creation efforts.

Collaboration Space When and Where You Need It

By partnering with Arraya Solutions to build, migrate and support SharePoint Online, businesses will see those benefits and more, including:

FREEDOM TO WORK WHEN AND WHERE YOU WANT – SharePoint Online and OneDrive for Business are available on any device, allowing you to access files wherever you are. Your file history syncs across devices, allowing you to seamlessly transition between devices.

ONLINE AND OFFLINE ACCESS – You can automatically sync your files from SharePoint Online and OneDrive for Business to your local computer for offline editing and management. Next time you are on the network, it syncs back up.

TIGHTER SECURITY – Traditional file security doesn't work once the document goes into email. You can use native controls to keep documents internal, but also layer on Azure Information Protection to control content at the file level, so no matter where the file goes, it is protected.

SOLVING BUSINESS CHALLENGES – SharePoint Online allows anyone to create rich collaboration portals with little guidance or education. Also, painful, legacy processes can be modernized and tracked with workflows.

DISCOVER ARRAYA

At Arraya Solutions, we began with a simple vision: To combine technological expertise and personal service that would empower our customers to solve their individual IT challenges. The result is more than 15 years of growth and solutions-driven results that have made us one of Microsoft's best partners.

Serving the mid-Atlantic region, we work with clients of all sizes, across all industries. Our passion for superior knowledge of the IT industry has led us down a path of tremendous growth, but we still make it a priority to keep our small-business roots—ensuring every customer receives the personal attention it deserves. Discover how our partnership with Microsoft can empower your business for greater success!

What Sets Us Apart

Recipient of Microsoft's Mid-Atlantic Area "Rising Star" award for FY14 & FY15

Member of CRN's Solution Provider 500 & Tech Elite 250 lists year after year

Deep talent pool across the Microsoft data center and collaboration stack

Gold managed partner with over 20 current Microsoft certifications

Structured but Nimble—the expertise of a large company with the personal attention and agility our customers depend on

We've worked hard to give our diverse customer base customized IT solutions.
